## Course \# 5

## Full-Length GPS Adventure

## (1.0 miles, 14 navigation points)

This is a longer GPS ONLY orienteering adventure. You can also use a GPS phone app.

Though based upon Course \#6, this GPS course has a slightly different path and relies upon GPS coordinates.

The Course Guide provides helpful hints along the way to keep you on course to the finishing point. Headings and distances are also provided to help get you started in the right direction, or project a point (if your GPS has that feature).

## Monuments:

Every navigation point is marked with a circular brass monument 2-3 inches in diameter.

## Validation Code:

There are letters stamped on the brass monuments.
Record the letters found on each monument (Verification Code). These letters will comprise a code validating your completion of the course IN THE PROPER SEQUENCE.

## Geocache:

Also, keep your eye out for a geocache stashed near a monument somewhere in this course.

To get into the geocache, you MUST know the year the Declaration of Independence was signed.

Once opened, sign the guest book inside!
Bring a little token goodie to leave inside the geocache if you want to take something out.

There are three main formats of latitude and longitude: Decimal Degrees (DD), Degrees Decimal Minutes (DDM), and Degrees Minutes Seconds (DMS). All three formats are provided. Use the format that is compatible with your GPS. You can also enter these coordinants into a major web browser and it will show you the location.
